

Credit Name: OOP 1

Assignment Name: RectangleTest

Error Log Entry

What error message did you encounter (if any)? Calling the wrong variable (Syntax error)

What unexpected behavior did your program exhibit? It would not run due to the error

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.) Using the wrong name when calling a class

Include a screenshot of specific lines of code.

```
if (obj instanceof rectangle) {  
    rectangle other = (rectangle) obj;  
    return this.length == other.length && this.width == other.width;  
}
```

How did you fix the issue? simply capitalize the name from rectangle to Rectangle

Provide the corrected code or solution using a screenshot.

```
if (obj instanceof Rectangle) {  
    Rectangle other = (Rectangle) obj;  
    return this.length == other.length && this.width == other.width;  
}
```
