

Instructions:

1. IPO crt reflections error logs

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	MySavings	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
User starts program and is prompted to choose what operation they want to do with their bank balance	Use class to use user's input (which choice and any other parameters) and use method inside said class	Outputs whichever choice user asked

IPO CHART

Program name:	Adder	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
User inputs answers to addition problems created at random by application. If incorrect, user is given 2 more chances. User can quit at any time by typing in 999.	Application creates numbers at random from 0 to 20. Displays addition problem. If user gets answer first try give 5 points, if second try give 3 points if third try 1 point (after that skip to next). If user quits (types 999) show total score	Total score at the end.
